**Note:**

- Before waxing please clean up your skis with fibretex abrasive (in one direction) (white non-abrasive- back and forward)
- Apply the first layer, cool down 5 minutes and apply the second layer
- Cool down 5-15 minutes in room's temperature
- Scrape the wax from skis
- Brush off the wax with bronze or cooper brush (one direction)
- Finish brushing with nylon brush (back and forward)
- Last step-Use nonabrasive fibretex to polish your skis and ski edges.
- 

**KICK WAX**
